1. This application contains claims directed to the following patentably distinct species:

Species A, that directed to making a master and simultaneously imprinting a replica (claims 15-30, 41-46, 51, 52, 61, 62);

Species B, that directed to aligning and tacking the substrate and master (claims 53-56, 63); and

Species C, that directed to imprinting by applying the master in stages (claims 57-60, 64). The species are independent or distinct because each employs steps not required for the other species. Clearly, the aligning and tacking of Species B is not required for the other species nor is the imprinting by stages of Species C required for the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2.Applicant's response of January 16, 2007 has been received and noted.

However, in view of the restriction requirement, comments directed thereto will be held in abeyance pending an election.
